INFO

# Mobility Project Dashboard

Welcome to the Mobility Projects Dashboard, a comprehensive analytical tool designed to provide insights into the intricacies of our global mobility projects.

This guide is designed to help you navigate through the comprehensive sections and features, ensuring you extract maximum value and insights from the data. Here's a breakdown:

## 1. Main Page

Purpose: Gain a broad overview of mobility projects, understanding trends, volumes, and general patterns.

How to Use: Simply scroll through to observe visual representations, charts, and key figures. Hover over charts for detailed data points.

## 2. Location

Purpose: Deep dive into both host country and home country perspectives. Understand which countries are primary contributors to mobility and which ones are major recipients.

## 3. Assignees

Purpose: Analyze the distribution of assignees in terms of gender, job title, function, and more. This section provides a human-centric view of mobility patterns.

How to Use:

- 1) Browse through various pie charts to understand assignee distribution.
- 2) Hovering over each segment provides a more detailed breakdown.

## 4. Filters

Purpose: Customize the data representation as per specific requirements. Whether you want insights for a particular country, region, or a specific time frame, filters are your go-to tool.

How to Use:

- 1) Country Filter: Click to select one or multiple countries to refine the dashboard's data representation.
  - 2) Region Filter: Choose a specific region (like EMEA, Americas) to view regional data.
  - 3) Fiscal Year & Quarter: Adjust the slider or select specific years and quarters to observe data for that particular time frame.
- Tip: Once filters are applied, all sections of the dashboard will update to reflect the filtered data, ensuring a consistent analysis perspective.

Enjoy your analytical journey!
